COTO DE GOMARIZ is a family winery where tradition and new technologies go hand in hand. Founded in the 70s, it has a long history with outstanding achievements in the world of viticulture, respectful of nature where "plants take care of plants".

Gomariz is a "Pago" in essence, that is; a specific rural area or site with specific soil characteristics:

Plots on granitic sand, clay and schist soils with SE-SW orientations in a valley naturally protected from Atlantic storms which, together with the use of only native Galician varieties, make it a privileged place for growing vines with a personality unique in the world.
