GOMARIZ (a word of Suevian origin derived from "gomariza=vine shoot") is the oldest wine estate on the Iberian Peninsula; it dates back to the 10th century and is known as the "Golden Mile of Ribeiro" due to its exceptional qualities for growing vines. The Carreiro family, returned emigrants, founded the winery in the 1980s. Today, 32 hectares of vineyards are cultivated solely with native varieties. It has been a pioneer in revealing that in the DO Ribeiro, in addition to whites, attractive reds with character can be made.
